The Ordway Seed & Farm Company

Season
1927

Ordway, Colorado

D. N. Shoemaker

INTRODUCTORY

TO PARTICULAR PLANTERS:

The Ordway Seed & Farm Company was incorporated about a year ago by Mr. E. E. Hosler, who for the past fifteen years has supplied a particular trade with Cantaloupe Seed. He has confined his trade to a few large shippers who require several thousand pounds of cantaloupe seed annually, and who appreciate the value of really good seed.

From the highly satisfactory results with this trade Mr. Hosler became advertised until he receives many inquiries each year for various amounts of vine seeds. Mr. Hosler organized the Ordway Seed & Farm Company to take care of this demand, and no order is too large or too small to receive our most careful attention. Ordway is located in the Arkansas River Valley, fifty miles east of Pueblo and twelve miles north of Rocky Ford, being in one of the best vine growing districts in the world.

It is our policy to sell only seed of our own growing and if out of stock we will not substitute or purchase on the market to fill your order; but will inform you where you may secure reliable seed. We will purchase for you if so requested. We grow a very complete line of melon, cucumber, squash, pumpkin, pea and bean seed, and will welcome inquiries regarding varieties not listed in this catalog.

Now is the time to place your order for delivery from the 1927 crop. You will readily appreciate the value of having your seed grown expressly for you. We will safeguard the quality and purity of your seed in every possible manner, and will pro rate your order in case of loss of crop. We will keep you informed regarding crop development throughout the growing season.

Sincerely yours.

THE ORDWAY SEED & FARM COMPANY.

CANTALOUPE

ORDWAY PINK MEAT

Developed from the Burrell Gem.

- VINES: Heavy growing, most prolific.
FRUIT: Oblong, ribbed, netted, splits with excess moisture.
